

Evening,

With thanks to all of those who participated in the interprofessional primary care team (IPCT) information session this afternoon, our Ottawa West Four Rivers OHT team is following up based on the discussion there and to ensure those who were unable to attend receive the same information.

Important

We request that you complete this [short survey](#) by Thursday, April 17th, confirming your interest in ROUND 1. This information will be shared with partners interested in the same high priority FSAs to support their connection with one another. Based on responses, FSA specific sessions may be scheduled (aiming for early next week).

The group suggested an early brainstorming session for those who are committed to putting a proposal forward in **ROUND 1** and are **open to the idea** of collaborating on a group proposal to present changes and improvements in multiple independent organizations to meet the collective priority to attach more patients to primary care.

New

ALL information and supportive resources related to the ROUND 1 targeted call for IPCT proposals **can now be found on our website:** [News and Updates - OWFR OHT](#)

We will continue to update information on our website as it becomes available (and to send briefer updates via email going forward). The session recording, slides, and updated participation list are posted, as are the data packages and other materials you may find helpful.

Earlier today we received the materials from the Ministry and Ontario Health sessions last week. Those materials are also now posted in the same location on our website. Their technical webinar deck includes screenshots and instructions for most of the steps to complete the application and budget – so we have also posted it alongside the proposal package on our website.

Please explore and reach out if you have questions.
